

Tuesday, September 1, 2015 - Spiritually Deaf

According to latest studies, over 1,000,000 people in the United States cannot hear or understand speech because of problems with their hearing. Over 40,000,000 are classified as having hearing problems of some degree. Medical science has done many wonderful things with surgeries and medical devices to help the hard of hearing find some relief. For those with total deafness, sign language, pencil and paper, and lip reading are just a few of the ways which they are able to communicate with others.

Unfortunately, this is not the only kind of deafness which plagues our country and our world. Mankind suffers from "Spiritual Deafness" which causes us to ignore or selectively hear God's Word.

What are the characteristics of "Spiritual Deafness?"

Please join us at the Wylie church of Christ, 901 S. Ballard, Wylie, Texas, this Sunday, September 6th, as we search God's Word for ways to improve our hearing of God's will for our lives. Bible class is at 9:30 and worship begins at 10:30.

When one is serious about hearing the Bible as God's Word, he is committing himself to a life of dramatic change. Are you ready to submit your life to God's will?

We hope to see you then!
